Easy and hard Images with ResNet18 for Reviewer UY6d

Below, we present 3 easy and 3 hard inputs according to the prediction depth in ResNet18, for two random classes in each of the four datasets used in this paper. These images are determined automatically as in Figure 1: they are not hand picked.

We can see the same behavior reported in Figure 1 of the paper holds for the images shown here. We are happy to add these to the appendix to strengthen the experimental evidence for prediction depth as a measure of example difficulty.

Dataset And Class	Easy Images	Hard Images
CIFAR10 Airplane		
CIFAR10 Truck		
CIFAR100 Bicycle		
CIFAR100 Trout		
Fashion MNIST Dress		
Fashion MNIST Sandal		
SVHN “Five”		
SVHN “Eight”
